DETAILED ACTION

The following is a first action on the merits of application serial no. 10/760,329 filed January 20, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Iiyama et al (4,294,205). Iiyama et al. discloses an intake system for an internal combustion engine, comprising: an intake manifold of the internal combustion engine adapted to receiving an air intake system in alignment with one or more air intake port openings in amounting surface of the intake manifold; and

an air intake system having a forwardly disposed air inlet and a plurality of air passages leading from the air inlet toward the one or more air intake openings in the intake manifold; wherein the distribution of air to all parts of the air inlet of the intake manifold is substantially uniform; and wherein each air passage in the air intake system has a decreasing cross-sectional area along the direction of air flow.
